Diagram of a 5-stage ladder network for a 16-point FFT. The input is on the left, and the output is on the right. The stages are labeled  $S_1, S_2, S_3, S_4$ . The input is split into four branches, each with a delay element ( $C_u/2, C_u/4, C_u/8, C_u/16$ ) and a butterfly operation. The output is also split into four branches, each with a delay element ( $C_u/2, C_u/4, C_u/8, C_u/16$ ) and a butterfly operation. The total delay is 148 units.
